

**ABSTRACT OF THE DISCLOSURE****DISPLAYING TEXT OF VIDEO IN BROWSERS ON A FRAME BY FRAME BASIS**

A method, system, and computer program product for  
5 presenting text from multimedia data to a user is  
provided. In one embodiment, multimedia data containing  
associated text data is received by a data processing  
system. The associated text data is extracted from the  
multimedia data. The associated text data is then  
10 outputted without outputting moving images from the  
multimedia data.
